**MODERNIZE YOUR WASTE
MANAGEMENT EQUIPMENT**

RETROFIT

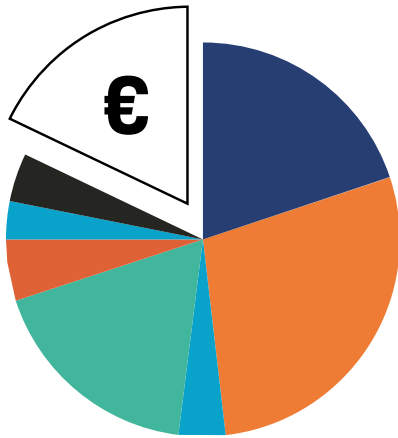

Europress SMART Retrofit is a smart add-on that can be installed on and connected to any waste handling machines, such as compactors or balers. It brings the latest Europress SMART features to any technical waste management device, regardless of device manufacturer or type.

SMART Retrofit collects real-time operating data from the device, e.g. filling and emptying information and operating information from safety switches.

The Europress SMART Retrofit system includes an integrated GPS module and a SIM card, so the location of the device is always known. The module has a back-up battery that keeps the device running even when the waste press is not connected to the power grid.

By connecting your waste management devices to the SMART device network, you can take advantage of Europress SMART's fleet management tools as well as other digital services.

TOTAL COST OF WASTE MANAGEMENT BEFORE AND AFTER SMART SERVICE

TOTAL COSTS:	BEFORE	AFTER
INVESTMENTS	15%	18%
HANDLING	30%	28%
MAINTENANCE	8%	4%
LABOUR	8%	5%
