HIGH ACCURACY | FULLY INTEGRATED SOLUTION
USER-SPECIFIC AUTOMATED REPORTS

INTELLIGENT SMART-TECHNOLOGY

EUROPRESS SCALE SYSTEM

Europress SMART Scale System for tipping devices is a state-of-the-art weighing system for waste compactors and waste handling. It is easy to operate and designed to meet various waste management requirements. The system is fully integrated and makes it easy to track the waste-flow of each user that's been granted access to the system.

The tipping devices can be used with bins from 140L to 1100L, and each and every bin will be weighed and registered in our SMART Scale system. The system allows multiple users and a wide range of reporting options.

Europress Scale System can be delivered to all Europress tipping devices and waste compactors which use the 2-phase tipping device. The turn-key system is fully integrated in the Europress SMART platform, both our website and our SMARTwaste APP.
